

Canvas Assignments to Google Calendar

Youssef Elzein
Ricardo Castellanos
Rizwan Vazifdar
Victor Flores
Hein Htet

What is it?

- Create Google Calendar Tasks for all published assignments on Canvas
- On the Modules page, it will scan each section and collect Assignments
- The user will be able to make any changes and add additional notes before inserting all the collected assignments into Google Calendar as Tasks

Who's it for?

- People who use Canvas for school and Google Calendar/Tasks personally
- It can be annoying/frustrating (and if you're super patient, there's no arguing it's time consuming) going through each assignment when it's published and manually entering each one into Google Calendar

Validating Value

- This tool should make entering Canvas assignments into Google Calendar a breeze
- It should be done really quickly
